I am writing with my view re planned proposal . I am a Garthdee resident and feel that Garthdee is one of the few true communities in Aberdeen . Students families elderly and disabled people live together here we have an excellent community centre school and church but a lot of homes with a lack of leisure facilities. A community garden would be highly beneficial to all to work together and to meet from old to young . I myself am disabled and feel isolated sometimes. Also we need to show the children that there are worthwhile things to do and they need to care for the planet . Food grown would give a sense of achievement which to me is so much more important than building more houses in an already well established environment . Please consider a very important community garden for all of us. Christine Bruce
