Subject: Opportunity site 116

To whom it may concern.

I live adjacent to the above site so would like to make comment about it's future development. The whole area has in recent years been quite heavily developed with flats and student accommodation but there has been absolutely no facilities to support this. Green space for both leisure and children's play for example is badly lacking so this site would be ideal. It could even be a mix of low density mixed housing including social and affordable homes with green/ play space open to all.

What we don't want is yet more large scale student accommodation developments.

I note the proposal to develop a new policy in relation to this. Ideally this should reflect the potential positive and negative impacts on existing residents, with priority given to the needs and rights of settled communities.

Regards
Gladys Main
