Please include comments on other documents below::

Protest against B1308 Royal Devenick Park phase 1

*I think it is important to maintain the green belt in Banchory Devenick as it is an essential habitat for the wide range of wildlife in the area. Also for the importance it has as the lung of the city provided by the ancient and widely planted trees in the area.

*The landscape vistas of Banchory Devenick especially Tolohill woods seen from other areas of Aberdeen would be degraded if the area was developed.

Development of the area would significantly impact on the landscape, green belt affecting the entrance to Aberdeen from the south.

*A local nature conservation site that is The Den of Leggart and designated a prime landscape area lies inside the Phase1 Royal Devenick Park site. The Den comprises of semi natural and ancient woodland providing habitat for a number of protected species.

*It is important that developers finish other numerous housing developments throughout Aberdeen and Aberdeenshire before another housing development is approved especially in an area of green belt that is used by many people from surrounding areas.
