Good morning,

In relation to the ongoing consultation on the Local Development Plan I would like you to record my views about the community amenity land identified as site B03-04 Craighden.

Although the site was not identified as a preferred site in the Draft Main Issue Report our local community is concerned that the status of this amenity land may change as part of the ongoing consultation process.

I would therefore like my concerns to be formally recorded and considered as part of this process and in the event of the landowner making representations to change the status of this community amenity land. My main concerns are:-

Loss of Amenity space

Reduced quality of life due to the loss of this valuable green space

Increased public and residents personal safety risk arising from an increase in road traffic volumes and access via a blind corner

Would you kindly confirm receipt of these concerns and I trust they will be recorded and considered appropriately as part of the process.

Best regards

Gerry Farrell
