I'm writing to share my views on the proposed building plans for the green space in Garthdee. I am against these plans as i believe green space is important for the residents of garthdee and we shouldn't lose out to more housing. I support the project of Gwen's garden which is an active community garden on this site and it would be awful to see such a project go to waste. Biodiversity is essential in this climate crisis and as a community we need to do everything possible to help reduce the effects of climate change.

Thank you,
Joseph Espindola.
