Subject: City development part of Phase 1 Royal Devenick Park

Dear Sir/Madam,

Re development plans for Banchory Devenick.

I am wring to OBJECT STRONGLY to any proposed development plans for Banchory Devenick where I have resided in my own property for about 40 years.

I understand that the area under consideration is legally of green belt status.. It provides a welcome contrast with the somewhat congested City of Aberdeen from which it has easy access. It is valuable not only in material terms but also by providing a natural environment for the wider community,promoting general health and mental wellbeing. It has a vital ecology with a wide variey of wildlife. Mammals, birds, trees and flowers are especialy evident in various habitats. It also makes a significant contribution to agriculture when production of food is a national necessariy.

It seems unnecessary to develop this area because of any demographics. On the contrary its traditional and historic character should be conserved for future generations.

Winifred M Young,
