

MRS P GAMMACK CLARK 7-5-2019

REF B0942. MILLTIMBER SOUTH.

Dear Sir

As I don't have internet access I am writing to you regarding the above.

The following is a list of my objections & fears as I am in a most vulnerable position.

1 The blocking of my natural light, my home is lower than the fields.

2 Invasion of privacy

3 Disturbing the water table

resulting in flooding of my home (which has happened in the past)

4 Devaluing of my property.

5 Health hazard & maintenance problems

due to construction dust & noise.

6 At 83yrs old I'd hoped what time is left to me would be lived in peace, not on a building site looking at walls!

The green belt is very important to all our residents & indeed to everyone, locals & tourists alike on Didsie.

What of the infrastructure?

The WPR was built to alleviate traffic congestion, with 60+ houses there could be 2/3/4 car households it doesn't make sense.

Sewage:- I built my home 89/90 & wasn't allowed to be on mains drainage or septic tank resulting in having to install a flight pump, now, are all these houses to be on mains drainage?

The B0942 is a violation of our green belt and should be returned to status quo for future generations.

Lastly, I invite the council, the recorder and anyone else involved to view the site from my home

Yours from the heart
