Housing Land Audit 2022 – Executive Summary

The Housing Land Audit illustrates the scale and characteristics of the housing land supply in Aberdeen City and Aberdeenshire. It is used to determine if there is sufficient land available for housing development and also to inform the planning of future infrastructure such as roads, schools and drainage.

The audit is undertaken annually by Aberdeen City and Aberdeenshire Councils in consultation with a wide range of stakeholders. It has a base date of 1st January 2022 and lists sites of five units or over which are allocated for housing in the local development plan or have planning consent for housing development. Recent and anticipated completions are recorded for each site.

Sites which are, or are expected to become available for development are classed as **effective**. If there are currently issues such as access or marketability problems preventing sites coming forward they are classed as **constrained**. More detail on these definitions can be found in Appendix 2.

The five year effective land supply (measured in housing units) is compared against the housing requirement set out in the [Strategic Development Plan](#) to determine whether there is sufficient land available for housing in each of the two housing market areas – the Aberdeen Housing Market Area, which includes Aberdeen City, and the Rural Housing Market Area. Each housing market area (HMA) should have a minimum of five years' worth of effective land.

2022 Housing Land Supply

Figure 1 shows the extent of the land supply in each area. In the Aberdeen HMA there continues to be a much higher proportion of effective land than in the Rural HMA where many sites are constrained, primarily by marketability.

Figure 1 Status of Housing Land Supply by Housing Market Area

Land Supply and Housing Supply Target

Table 1 shows that there is more than five years' worth of effective housing land available in both housing market areas when measured against the housing supply target in the Strategic Development Plan 2020 with 6.6 yrs in the Aberdeen HMA and 6.6 yrs in the Rural HMA.

Table 1 Land Supply and Housing Target 2022

Housing Market Area	SDP Housing Supply Target 2022-2026	Five Year Effective Supply 2022	Number of Years Supply
Aberdeen HMA	8,800	11,600	6.6
Rural HMA	2,200	2,914	6.6

In both housing market areas there is additional land in the post five year effective supply (14,573 units in the Aberdeen HMA and 2,749 units in the Rural HMA) which could come forward sooner if demand increases and sites are built out more quickly.

There are also a further 5,765 units in the Aberdeen HMA and 6,270 units in the Rural HMA in the constrained supply which could contribute to the effective supply in future if constraints are resolved. Figure 2 shows the percentage of constrained units which are affected by each type of constraint.

Figure 2: Percentage of units in the constrained supply affected by each type of constraint

In the Aberdeen HMA the majority of constrained units are in Aberdeen City and are affected by an 'Ownership' constraint. These currently do not meet the criteria for inclusion in the effective supply as set out in the guidance in [PAN 2/2010](#). This states that when a site is in the ownership of a local authority or other public body, the units can only be included once the site is part of a programme of land sales.

In the Rural HMA limited market demand across much of the area and a generous supply of land means that 'Marketability' is the most significant constraint affecting 3,886 units on 74 sites. Of these, 2,596 units on 50 sites are constrained *only* by marketability while the remainder also have other constraints. If demand picks up, these sites could come forward.

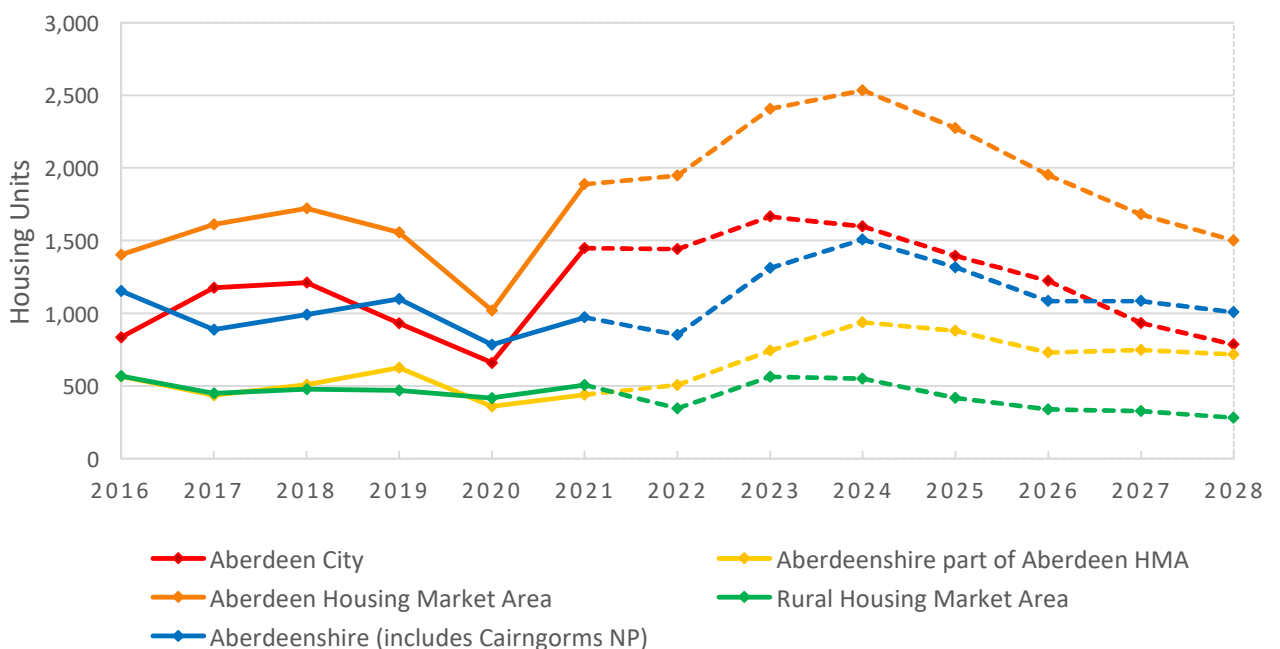

Further details on constrained sites are set out in [Section 4.2](#) of the main report.

Housing Completions

Figure 3 shows actual and anticipated completions for each of the local authority areas and the housing market areas. The impact of the pandemic can be clearly seen in the sharp drop in completions in 2020.

Annual completions in the Aberdeen HMA are expected to increase over the next few years, due mainly to continued progress on local development plan sites, particularly in Aberdeen City. In the Rural HMA, completions generally averaged around 500 units per annum up to 2021 but this is expected to fluctuate slightly over the next 5 years due to more difficult market conditions. Anticipated completion rates always tend to appear high in the first five years from the base date of the audit then tail off in later years. In reality, completions are likely to be maintained at a more steady rate as it becomes clear which effective sites will come forward first and build rates are adjusted by developers in response to the local market situation.

Figure 3: Actual and Anticipated Housing Completions by Area 2016-2028

1. Introduction

1.1 Purpose of Audit

- 1.1.1 The housing land audit illustrates the scale and characteristics of the current housing land supply in Aberdeen City and Aberdeenshire. It explains the background to the identification of the land supply and the way in which it is determined. It then reviews the main characteristics of the current supply and gives details of each site. The base date of this Housing Land Audit is 1 January 2022.
- 1.1.2 The report has been produced using Scottish Government guidance contained within [Planning Advice Note 2/2010 Affordable Housing and Housing Land Audits](#), which sets out the criteria for the inclusion of sites in the audit, and gives guidance on determining the status of these sites.

1.2 Preparation of Audit

- 1.2.1 The statement of land supply in Aberdeen City and Aberdeenshire is the result of systematic preparation and consultation, the main elements of which are:

Regular Monitoring: The existing land supply is kept up to date during the year by regular monitoring. The information kept under review includes house completions, permissions granted and new allocations. The base date for the audit is taken to be 1st January every year to allow direct comparisons between individual years.

Housebuilders Survey: Developers, landowners and agents are contacted each year to confirm the details held on housing sites and give anticipated development rates. In addition, they are asked to identify any relevant constraints on development and give details of what action is being taken to bring sites forward.

Consultation on Draft Land Supply: The information is consolidated to produce a draft statement of land supply. This draft is made available on the Aberdeenshire Council and Aberdeen City Council websites for consultation and notification is sent to Homes for Scotland, Scottish Environment Protection Agency (SEPA), Scottish Water, NatureScot, and a number of large and small developers and agents. Once all responses to the draft have been received and analysed by the two Councils, a meeting is held with consultees with a view to producing an agreed statement of the land supply situation.

Publication of Final Report: The final report is published on both Council's websites.

1.3 Housing Market Areas

1.3.1 The housing land audit is divided up by Housing Market Area. The Aberdeen Housing Market Area (AHMA) includes Aberdeen City and the part of Aberdeenshire which forms roughly a 20 mile radius of the City boundary. The Rural Housing Market Area (RHMA) takes in the rest of Aberdeenshire excluding the part that falls within the Cairngorms National Park (CNP). Sites in the CNP are listed separately with a summary in Chapter 7. Figure 4 shows the housing market areas.

Figure 4: Map of Aberdeen City, Aberdeenshire and Housing Market Areas

1.4 Land Supply Definitions

1.4.1 Three categories of land are identified in the audit.

1.4.2 The **Established** Housing Land Supply includes sites allocated for housing in the Local Development Plan, unallocated sites with a current planning consent, the remaining capacity of sites under construction, and other sites with agreed potential for development. Within the Established Supply, sites may be classed as effective or constrained.

1.4.3 The **Effective** Housing Land Supply includes all sites which do not have identified constraints and are therefore expected to be available for housing development. The Five Year Effective Supply consists of the total number of units which are expected to come forward within five years of the base date of the audit and includes an estimate of the likely contribution on small sites of less than five units. This total is

the figure used to measure the adequacy of the land supply for Strategic Development Plan monitoring purposes. Units on effective sites which are programmed beyond the five year period fall into the Post Five Year Effective Supply.

- 1.4.4 The **Constrained** Housing Land Supply consists of those sites or parts of sites which have problems preventing development starting within five years from the base date of the audit.
- 1.4.5 In summary, the Established Supply is calculated by adding together the Effective Supply (5 Yr), the Effective Supply (Post 5 Yr) and the Constrained Supply.
- 1.4.6 Appendix 2 lists all the sites which currently make up the housing land supply. It gives details of each site including the number of units remaining at the base date of the audit and how many are effective and constrained. It also provides recent and anticipated completions for each site. Only sites of five or more units are listed. Figures for small sites are given in [Table 9](#).
- 1.4.7 Maps and further detail on the sites listed in the Housing Land Audit can be found online at <http://www.aberdeenshire.gov.uk/council-and-democracy/statistics/Housing-Market/>
<http://www.aberdeency.gov.uk/housinglandaudit>

2. Background to Housing Land Audit 2022

2.1 2022 Draft Housing Land Audit Consultation

- 2.1.1 Responses to the draft audit were received from Homes for Scotland, Stewart Milne Homes, Case Consulting, Barratt Homes North Scotland, Turnberry and Lippe Architects.
- 2.1.2 An online meeting was held on 9 June 2022 to discuss outstanding issues and move towards an agreed position on audit sites. It was attended by a number of housebuilders and agents (representing Stewart Milne Homes, Barratt North Scotland, Turnberry (for Elswick Development Co) and Bancon Homes), a representative from Homes for Scotland, officers of the two Councils and an independent Chair. Some general issues relating to the audit were discussed at the meeting and there was detailed discussion on individual sites in a range of locations.

2.2 Development Plans

- 2.2.1 Aberdeen City and Aberdeenshire adopted Local Development Plans (LDPs) in 2017 which remain the up to date LDPs for the two council areas. New LDPs are currently being progressed. In Aberdeenshire, the examination into the proposed plan was undertaken in 2021/2022 and is now complete with the Report of the Examination received in June 2022. The intention is to adopt the LDP later this year. In Aberdeen City, the examination is ongoing with the Report of Examination expected in late summer and adoption thereafter.
- 2.2.2 The Aberdeen City and Shire Strategic Development Plan 2020 was published on 26 August 2020. This remains valid until strategic development plans are replaced by the new National Planning Framework 4, which is expected to be laid in the Scottish Parliament in Autumn 2022.

Courtesy of Bancon Homes

3. Established Housing Land Supply

3.1 Established Housing Land Supply

3.1.1 The Established Housing Land Supply for the Aberdeen City and Shire Strategic Development Plan Area and the housing market areas is shown in [Table 2](#).

Table 2 Established Housing Land Supply 2021 and 2022

Area	2021	2022	Change
Aberdeen City	21,085	20,126	-5%
Aberdeenshire (part)	11,650	11,324	-3%
Small Sites AHMA	523	488	-7%
Aberdeen Housing Market Area	33,258	31,938	-4%
Aberdeenshire RHMA	11,544	11,231	-3%
Small Sites RHMA	716	702	-2%
Rural Housing Market Area	12,260	11,933	-3%
Strategic Development Plan Area	45,518	43,871	-4%

3.1.2 The Established Housing Land Supply in the Strategic Development Plan Area is 43,871 units and has remained largely unchanged, with a small net decrease of 4% since 2021.

3.2 Greenfield / Brownfield Land

3.2.1 [Table 3](#) shows the relative proportions of the Established Supply which are located on greenfield and brownfield land.

Table 3 Proportion of Established Land Supply on Greenfield and Brownfield Land

Area	Greenfield	Brownfield
Aberdeen City	80%	20%
Aberdeenshire (part)	92%	8%
Aberdeen Housing Market Area	84%	16%
Rural Housing Market Area	91%	9%
Strategic Development Plan Area	83%	17%

3.2.2 Within Aberdeen City there is a higher proportion of housing land on brownfield sites, while Aberdeenshire housing land continues to be predominantly on greenfield sites.

Courtesy of Colaren Homes

4. Constrained Housing Land Supply

4.1 Constrained Housing Land Supply

- 4.1.1 The Constrained Housing Land Supply for the Aberdeen City and Shire Strategic Development Plan Area and the housing market areas is shown in Table 4.

Table 4 Constrained Housing Land Supply 2021 and 2022

Area	2021	2022	Change
Aberdeen City	5,134	5,147	0%
Aberdeenshire (part)	1,041	618	-41%
Aberdeen Housing Market Area	6,175	5,765	-7%
Rural Housing Market Area	6,059	6,270	3%
Strategic Development Plan Area	12,234	12,035	-2%

- 4.1.2 A total of 12,035 units are constrained in the Strategic Development Plan Area, a net 2% decrease since 2021.
- 4.1.3 In Aberdeen City there has been almost no change in the number of constrained units since 2021. In the Aberdeenshire part of the AHMA the constrained supply decreased by 41%. This was due to 418 units on one site in Balmedie (F/BAH/030) moving from the constrained supply to the post five year effective supply.
- 4.1.4 In the RHMA there was a minor increase of 3% since the previous year as several sites moved over from the effective supply and the constrained supply in this area remains high at 6,270 units. The RHMA is particularly affected by low demand in some parts of the area which, in combination with a generous supply of land, means that many rural sites are not currently expected to come forward in the short to medium term.

4.2 Analysis of Constraints

- 4.2.1 Sites are regarded as constrained if they **do not** meet the criteria set out in PAN 2/2010

Ownership: the site is in the ownership or control of a party which can be expected to develop it or to release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land sales

Physical: the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective land supply

Contamination: previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing

Deficit Funding: any public funding required to make residential development economically viable is committed by the public bodies concerned

Marketability: the site, or a relevant part of it, can be developed to provide marketable housing

Infrastructure: the site is either free of infrastructure constraints, or any required infrastructure can realistically be provided by the developer or another party to allow development

Land Use: housing is the sole preferred use of the land in planning terms or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing becoming a realistic option

4.2.2 [Table 5](#) and [Table 6](#) show the breakdown of constraints for each of the two housing market areas. Please note that the total of the number of units given does not equal the number of units in the Constrained Supply as some sites have more than one constraint and therefore will be counted twice. Similarly, percentages do not sum to 100%. An additional category of ‘Other’ is included to cover constraints not listed above.

Aberdeen Housing Market Area

4.2.3 The main constraint in the Aberdeen HMA is ownership with 59% of constrained units being affected by this issue. The majority of the ownership constrained units are on sites owned by Aberdeen City Council which cannot be deemed effective until they are on a programme of land disposal, according to the criteria in PAN2/2010. The number of constrained sites in the Aberdeenshire part of the Aberdeen HMA remains relatively low, with marketability being the most common constraint, closely followed by ownership where owners/ developers are deciding not to bring sites forward for development at present.

[Table 5 Constraint Analysis, Aberdeen Housing Market Area](#)

Constraint	No. of Sites	No. of Units	% of Constrained Units
Contamination	1	29	0.5%
Funding	0	0	0%
Infrastructure	4	275	5%
Land Use	7	1,123	19%
Marketability	20	840	14%
Other	2	79	1%
Ownership	29	3,477	59%
Physical	2	95	2%

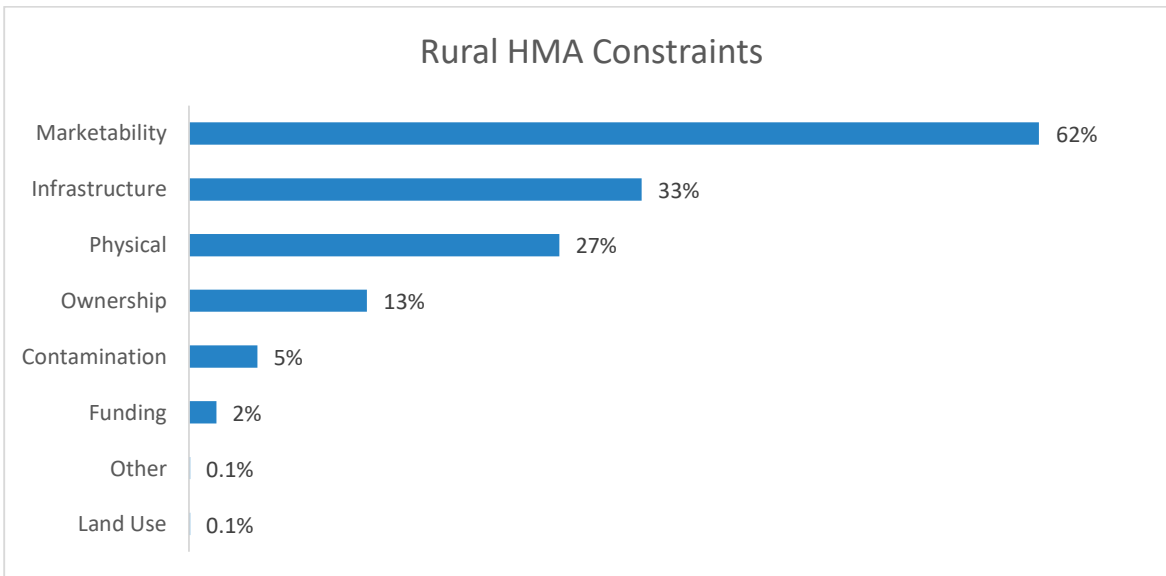

Rural Housing Market Area

4.2.4 In the Rural HMA limited market demand across much of the area and a generous supply of land means that 'Marketability' is the most significant constraint affecting 3,886 units on 74 sites. Lack of infrastructure or difficulty in providing it is also an important constraint affecting 33% of units and is closely related to the marketability issue. In many cases, infrastructure could be provided if there was sufficient demand to make that investment financially viable for developers in terms of house sales. In addition, 27% of constrained units have a physical constraint - this is often a problem with providing access to the site or it may be affected by flooding.

Table 6 Constraint Analysis, Rural Housing Market Area

Constraint	No. of Sites	No. of Units	% of Constrained Units
Contamination	1	300	5%
Funding	5	119	2%
Infrastructure	13	2,080	33%
Land Use	1	5	0.1%
Marketability	74	3,886	62%
Other	1	5	0.1%
Ownership	38	822	13%
Physical	18	1,695	27%

4.3 Constrained Sites and Completions

4.3.1 In Appendix 2, constrained units are listed as a total rather than being programmed by year. This does not prevent them from coming forward earlier if constraints are resolved. It simply means that as at 1 January 2022 we did not have sufficient information to determine when that might happen.

Courtesy of Cala Homes

5. Effective Housing Land Supply

5.1 Five Year Effective Housing Land Supply

5.1.1 The five year Effective Housing Land Supply for the Aberdeen City and Shire Strategic Plan Area and the housing market areas is shown in Table 7.

Table 7 Five Year Effective Housing Land Supply 2021 and 2022

Area	2021	2022	Change
Aberdeen City	7,055	7,319	4%
Aberdeenshire (part)	3,827	3,793	-1%
Small Sites AHMA	523	488	-7%
Aberdeen Housing Market Area	11,405	11,600	2%
Aberdeenshire RHMA	2,416	2,212	-8%
Small Sites RHMA	716	702	-2%
Rural Housing Market Area	3,132	2,914	-7%
Strategic Development Plan Area	14,537	14,514	0%

5.1.2 The five year Effective Supply in the Strategic Development Plan Area is 14,514 units, essentially unchanged since last year.

5.1.3 In the AHMA the net effect of changes in the Aberdeen City and Aberdeenshire part of the AHMA resulted in a small net increase of 2%. The 4% increase in Aberdeen City was supported by increased investment in affordable housing programmes. In Aberdeenshire there was a minor net decrease of 1%.

5.1.4 There is a 7% decrease in the five year supply in the Rural HMA. This is due to several sites moving from the effective to the constrained supply due to lack of market demand.

5.1.5 80% of the Effective Supply is located in the Aberdeen HMA with 64% of the effective units within the Aberdeen HMA being located within Aberdeen City. Within the Strategic Development Plan Area as a whole, 51% of effective units are located within Aberdeen City and 49% in Aberdeenshire.

5.2 Post Five Year Effective Supply

5.2.1 Table 8 shows the total number of units on effective sites which are expected to be built beyond the five year period for each housing market area and gives a comparison with 2021.

Table 8 Effective Units Programmed Beyond Year 5 in 2020 and 2021

Area	2021	2022	Change
Aberdeen City	8,896	7,660	-14%
Aberdeenshire (part)	6,782	6,913	2%
Aberdeen Housing Market Area	15,678	14,573	-7%
Rural Housing Market Area	3,069	2,749	-10%
Strategic Development Plan Area	18,747	17,322	-8%

5.2.2 Since 2021 there has been a decrease of 8% in the number of effective units programmed beyond the first five years from the base date of the audit (2027 onwards) in the Strategic Development Plan Area.

5.2.3 In the AHMA there was a net decrease of 7% due in part to some larger sites in the City being programmed at a slightly faster pace in comparison to the previous year and more units falling into the 5 year effective supply. In the RHMA there was a net decrease of 10% as several sites with units programmed in the post 5 year period moved from the effective to the constrained supply.

5.3 Small Sites

5.3.1 The housing land audit focuses on sites with a capacity of five or more units. In addition, there are many smaller sites which can be developed for housing, including conversions and sub-division of existing residential properties, and this forms an important component of the effective housing land supply, particularly in rural areas.

5.3.2 The small sites figures are based on an analysis of completions over the past five years. This is in line with Scottish Government guidance, which recognises the practical difficulties in identifying individual small sites and suggests the use of an aggregated figure. Small sites completions in the part of the Cairngorms National Park Authority within Aberdeenshire have been excluded. Aberdeen City have made minor adjustments retrospectively to their 2019 and 2020 small site completions.

5.3.3 [Table 9](#) shows annual completions on small sites for each area. The contribution of small sites to the five year effective supply is therefore the average figure for each of the housing market areas multiplied by five years to give the totals highlighted above.

Table 9 Completions on Small Sites 2017-2021

Year	Aberdeen City	Abshire part of AHMA	AHMA	RHMA
2017	36	73	109	135
2018	34	79	113	140
2019	20	74	94	160
2020	24	66	90	111
2021	19	63	82	160
5 Year Total	133	355	488	702
5 Year Average	27	71	98	140

5.4 Completions

5.4.1 *Figure 5 shows actual and anticipated completions for each of the local authority areas and housing market areas. The impact of the pandemic can be seen in the sharp drop in completions in 2020.*

Figure 5 Actual and Anticipated Housing Completions by Area 2016-2028

Annual completions in the Aberdeen HMA are expected to increase over the next few years, due mainly to continued progress on local development plan sites, particularly in Aberdeen City. In the Rural HMA, completions generally averaged around 500 units per annum up to 2021 but this is expected to fluctuate slightly over the next 5 years due to more difficult market conditions.

5.4.2 Completions always appear highest in the first five years after the base date of the audit then appear to tail off in later years. This is really a reflection of greater uncertainty in the medium to long term which leads to more conservative estimates. In reality, completion levels tend to be maintained at a more steady rate as it becomes clear which effective sites will come forward first and build rates are adjusted by developers in response to the local market situation and this can be seen as the audit is rolled forward each year. Future completions are also supplemented by the contribution from small sites and windfall sites. More detail on completions can be found in Appendix 1.

Courtesy of Annie Kenyon Architects

6. Housing Supply Target and Five Year Effective Supply

6.1 Housing Supply Target and Five Year Effective Supply

6.1.1 The [Aberdeen City and Shire Strategic Development Plan 2020](#) sets out the housing supply target for each housing market area. In order to demonstrate that there is a five year supply of land for housing, the number of effective units must be greater than or equal to the housing supply target for the five year period concerned.

6.1.2 [Table 10](#) shows that there is more than five years supply in both housing market areas.

Table 10 Housing Supply Target and Effective Supply 2022

Housing Market Area	SDP Housing Supply Target 2022-2026	Five Year Effective Supply 2022	No. of Years Supply
AHMA	8,800	11,600	6.6
RHMA	2,200	2,914	6.6

6.1.3 [Figure 6](#) shows the trend in the Five Year Effective Supply for both housing market areas over the past ten years and compares it to the SDP Housing Supply Target. The 2020 SDP introduced a change to the proportion of the housing supply target to be met in each housing market area, increasing the share of the Aberdeen HMA to 80% and decreasing the Rural HMA to 20%. This can be seen on the graph from 2021.

Figure 6 Five Year Effective Supply and Housing Supply Target 2013-2022

- 6.1.4 In the Aberdeen HMA, the five year effective land supply has continued to be above 10,000 units each year since 2013 and remains well in excess of the five year target.
- 6.1.5 In the Rural HMA, the effective supply has remained fairly steady up to 2020 and declined slightly since 2021, now standing at 2,914 units, but continues to comfortably meet the five year target. The extent of the five year effective supply in the Rural HMA is primarily limited by low demand in the market in much of the area which affects what can realistically be expected to come forward within five years. As a result, only a small amount of the total land available appears in the five year effective supply.
- 6.1.6 In Aberdeen City and Aberdeenshire, the calculation to assess the adequacy of the land supply has always used the housing supply target figure (known as the 'housing requirement' in the previous SDP) to compare against the five year effective supply. This is the agreed method used by local authorities to provide land supply figures for the [Planning Performance Framework](#) National Headline Indicators. However, recent court judgements have recommended comparing the land supply with the housing land requirement (HLR). The HLR figure, also set out in the 2020 SDP, provides additional generosity of up to 20% on top of the housing supply target in order to ensure that sufficient land is available to deliver the housing supply target, even if some sites fail to progress as anticipated. For information, this comparison is provided in [Table 11](#) below which shows that there is more than five year's supply in both housing market areas when compared against the HLR.

Table 11 Housing Land Requirement and Effective Supply 2021

Housing Market Area	SDP Housing Land Requirement 2022-2026	Five Year Effective Supply 2022	No. of Years Supply
AHMA	10,560	11,600	5.5
RHMA	2,640	2,914	5.5

6.2.1 Agreement on Five Year Effective Supply

- 6.2.1 An integral part of the process of preparing the Audit is consultation with representatives of the housebuilding industry and other interested parties in order to try to reach agreement on the five year effective supply. This year agreement was reached with stakeholders on the status of all sites except two sites in Aberdeenshire which were disputed by one consultee, Case Consulting. The dispute related to the current lack of school capacity in the corridor. An options appraisal is currently being undertaken by Aberdeenshire Council to address this issue but the consultee wished to dispute the effectiveness of the sites until such time as a firm proposal is agreed. The 89 disputed units on these two sites are equivalent to 0.8% of the five year effective supply in the Aberdeen HMA.

Table 12 Disputed Sites 2022

Housing Market Area	Site Code	Settlement	Location	Number of 5yr effective units disputed
Aberdeen	F/BA/H/029	Balmedie	Land at Balmedie South	24
Aberdeen	F/BA/H/030	Balmedie	Menie (Trump International)	65

7. Cairngorms National Park Sites

7.1 Cairngorms National Park Sites

- 7.1.1 The area of Aberdeenshire which falls within the Cairngorms National Park (CNP) is not covered by the Aberdeen City and Shire Strategic Development Plan or the Aberdeenshire Local Development Plan. It is covered instead by the [CNP Local Development Plan](#). Housing sites within the CNP therefore do not contribute towards the land supply totals for the Aberdeenshire Rural HMA.
- 7.1.2 Housing sites located within the CNP boundary are monitored in this Housing Land Audit on behalf of the National Park Authority. A summary is given in [Table 13](#) below. In addition, full details of the sites are given separately at the end of Appendix 2 with completions by settlement available in Appendix 1.

Table 13 Housing Sites in Aberdeenshire Part of Cairngorms National Park

Settlement	Ref No	Location	LDP Code	Established	Constrained	Post 5 Year Effective	5 Year Effective
Ballater	M/BL/H/018	Monaltrie Park	H1	250	0	230	20

 - Aberdeenshire Rural Housing Market Area
 - Aberdeenshire Part of Cairngorms National Park

Key to Housing Land Audit Tables

Site Ref. No.

Housing land audit unique site reference number.

Location

Location/ address of site.

Main Developer

Main developer or agency responsible for the development of the site.

Status

Allocated	Allocated for housing in a LDP
Outline PP	Outline planning permission
Full PP	Full planning permission
Detailed PP	Detailed planning permission
PPP	Planning permission in principle
MSC	Approval of Matters Specified
Under Construction	

Type

Greenfield (G) - Sites where no building has previously taken place
Brownfield (B) – Sites which have previously been developed or used from some purpose which has ceased. May include re-use of existing buildings by conversion, demolition and new build or new

build on previously vacant or derelict land. Excludes private and public gardens, sports and recreation grounds, woodland and amenity open spaces.

Year Entered

The year the site first entered the audit.

Curr. LDP

2017 Aberdeenshire Local Development Plan reference code.

Prev. LDP

2012 Aberdeenshire Local Development Plan reference code.

ALDP Code

2017 Aberdeen City Local Development Plan reference code.

Constraint

Reason why the site is constrained. One or more reasons may be given. Sites are regarded as constrained if they **do not** meet the criteria set out in [PAN 2/2010](#) :

Ownership: the site is in the ownership or control of a party which can be expected to develop it or to release it for development. Where a site is in the ownership of a local authority or other public

body, it should be included only where it is part of a programme of land sales;

Physical: the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective land supply;

Contamination: previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;

Deficit funding: any public funding required to make residential development economically viable is committed by the public bodies concerned;

Marketability: the site, or a relevant part of it, can be developed to provide marketable housing;

Infrastructure: the site is either free of infrastructure constraints, or any required infrastructure can realistically be provided by the developer or another party to allow development;

Land use: housing is the sole preferred use of the land in planning terms or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing becoming a realistic option.

Other: the site is free from other constraints not covered by the categories above.

Total Capacity

Total number of units on the site.

Remaining Capacity (1st Jan)

Number of units still to be built as at 1 January of the audit year.

Can also be referred to as the number of 'Established' units.

5 Yr Effective

Number of units which are expected to be built within 5 years from the base date of the audit (1st January each year). To be considered effective, sites must meet the criteria listed above as set out in [PAN 2/2010](#).

The 5yr effective supply is used to determine if there is sufficient land for housing. The total number of units in the 5 yr effective supply is measured against the housing requirement set out in the [Strategic Development Plan](#). Each housing market area must have a minimum of five years worth of land based on this measure.

Post 5yr Effective

Units on effective sites which are expected to be built beyond the first 5 years.

Constrained

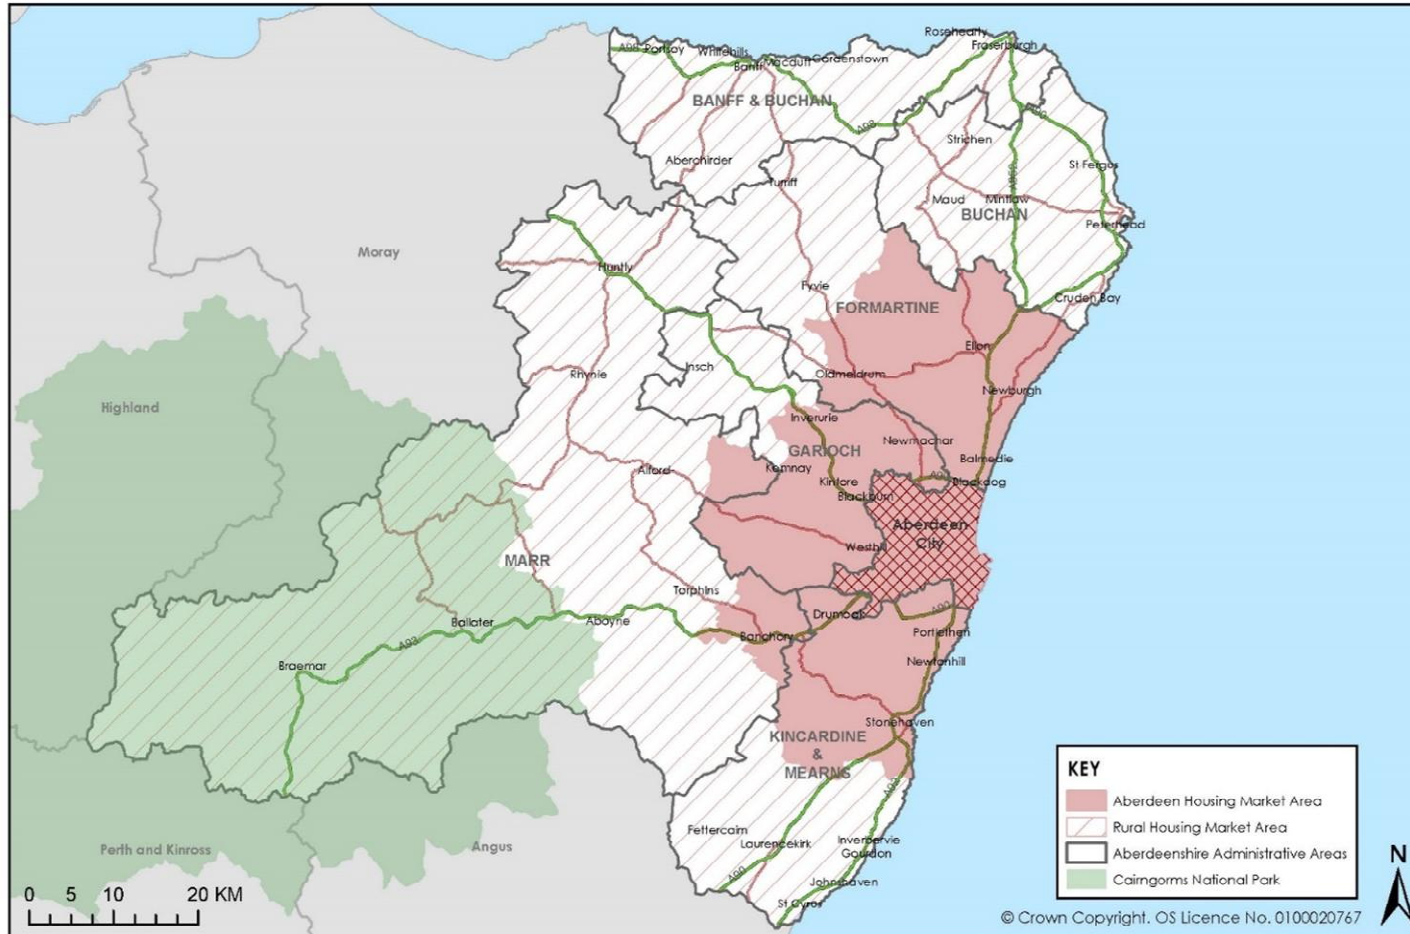

Number of units which are not expected to come forward within 5 years because they have one or more constraints preventing development.

Completions

Actual and anticipated completions are shown from 2019 to 2029. Note that sites may have completions prior to 2019 which are not shown here. As a result, totalling the completions shown may not add up to the Total Capacity figure.
